SOVI
TEACHING ROBOT

WHILE OTHERS PREPARE CHILDREN FOR THE PAST, ONE INSTITUTION WILL DEFINE THEIR FUTURE.

ABOUT US

Mensch Robotics is a deeptech robotics startup on a mission to build human-centric robots for societal advancement. Incorporated in 2024 and backed by the Kerala Startup Mission, IHFC - Technology Innovation Hub of IIT Delhi, and Startup India, we use physical AI to uplift the sectors that matter most.

Our hardware and software weren't designed purely in lab-they were shaped by real pilot observations inside Indian classrooms. We understand what real school environments look like: ambient classroom noise, school floor conditions and varying comfort levels with new technology among staff. We treat our partner institutions as co-creators. Feedback of your teaching staff shapes our updates and feature roadmap, ensuring it stays an active asset in your school.

"The future classroom of India is already being written. Will your institution follow it, or be part in creating it?"

MENSCH ROBOTICS

ABOUT SOVI

SOVI is Mensch Robotics' AI-powered humanoid learning companion, built to bring a physical, responsive presence into classrooms. Designed to work alongside teachers rather than replace them.

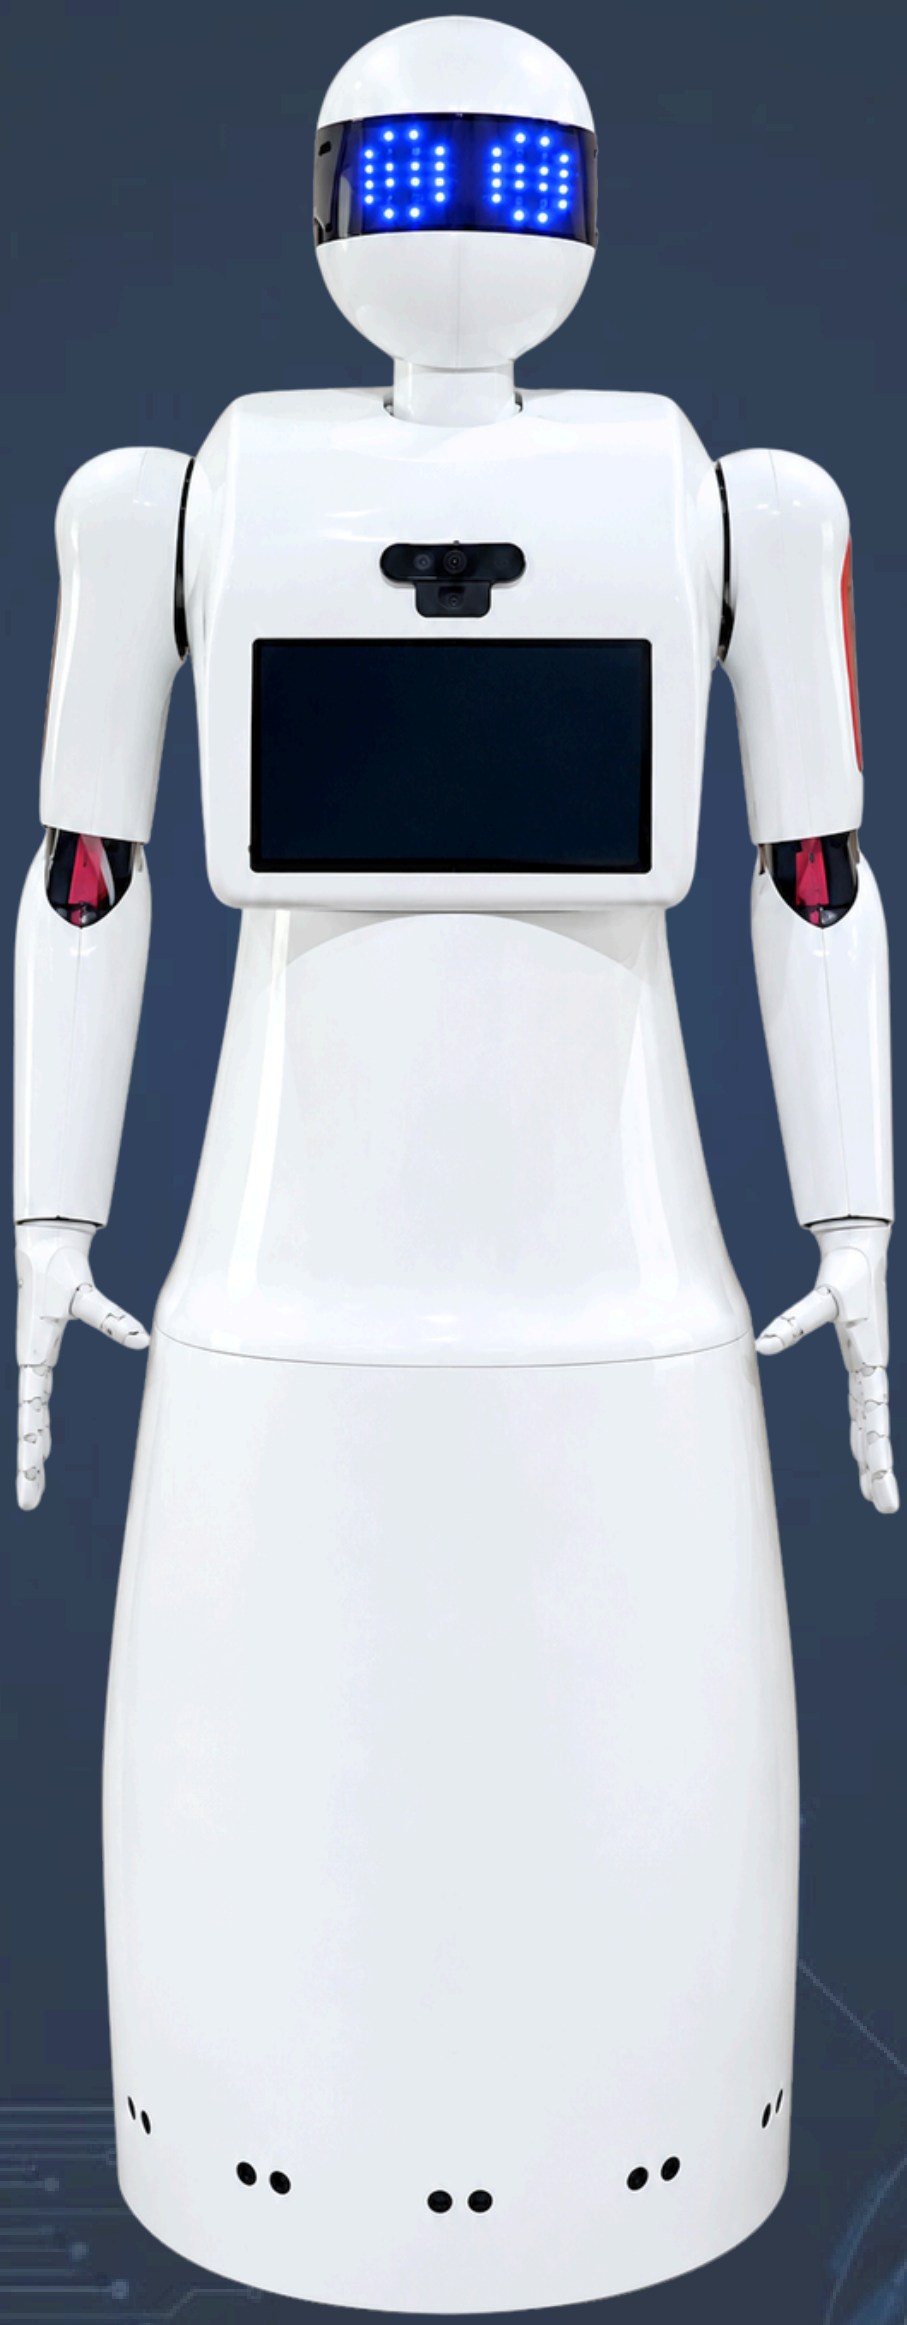

SOVI can hold real conversations, answer questions across subjects, and speak in multiple languages — turning everyday learning into an interactive experience. It recognizes students, remembers them across sessions, and reacts with natural gestures and expressive eyes, making every interaction feel personal rather than programmed. SOVI can conducts debate on learning topics, helps to visualize complex topic with explanation and youtube videos.

MENSCH ROBOTICS

MEET SOVI,

Features

Interactive touch Displays

Multilingual Voice Assistant

AI Capabilities

Face Recognition

Android App

Automatic Navigation

www.menschrobotics.com

MENSCH ROBOTICS

HARDWARE SPECIFICATIONS

- High-performance onboard AI processor
- Dedicated cloud servers for fast, reliable processing
- Automatic and manual navigation modes
- 3 DoF per arm — shoulder, elbow, and palm articulation
- Rotating head with expressive LED eyes
- Integrated camera, mic, and speakers
- Durable glass fibre shell with metal frame.

Two ways of Movement

Autonomous mode

SOVI navigates on its own, sensing and steering around obstacles as it moves through a room.

Manual mode

An android app drives SOVI over Bluetooth — direct, hands-on control when you want it.

MENSCH ROBOTICS

SOFTWARE SPECIFICATIONS

- Advanced conversational AI engine
- Multilingual voice interaction with wake-word activation
- Facial recognition with personalized memory
- AI powered learning activities and teaching modes
- Live knowledge search and retrieval
- Secure, multi-user cloud-ready backend

3 Modes of Learning

Smart Learning

Open Q&A across subjects, grounded by web search and retrieval when it's needed.

Interactive Speaking

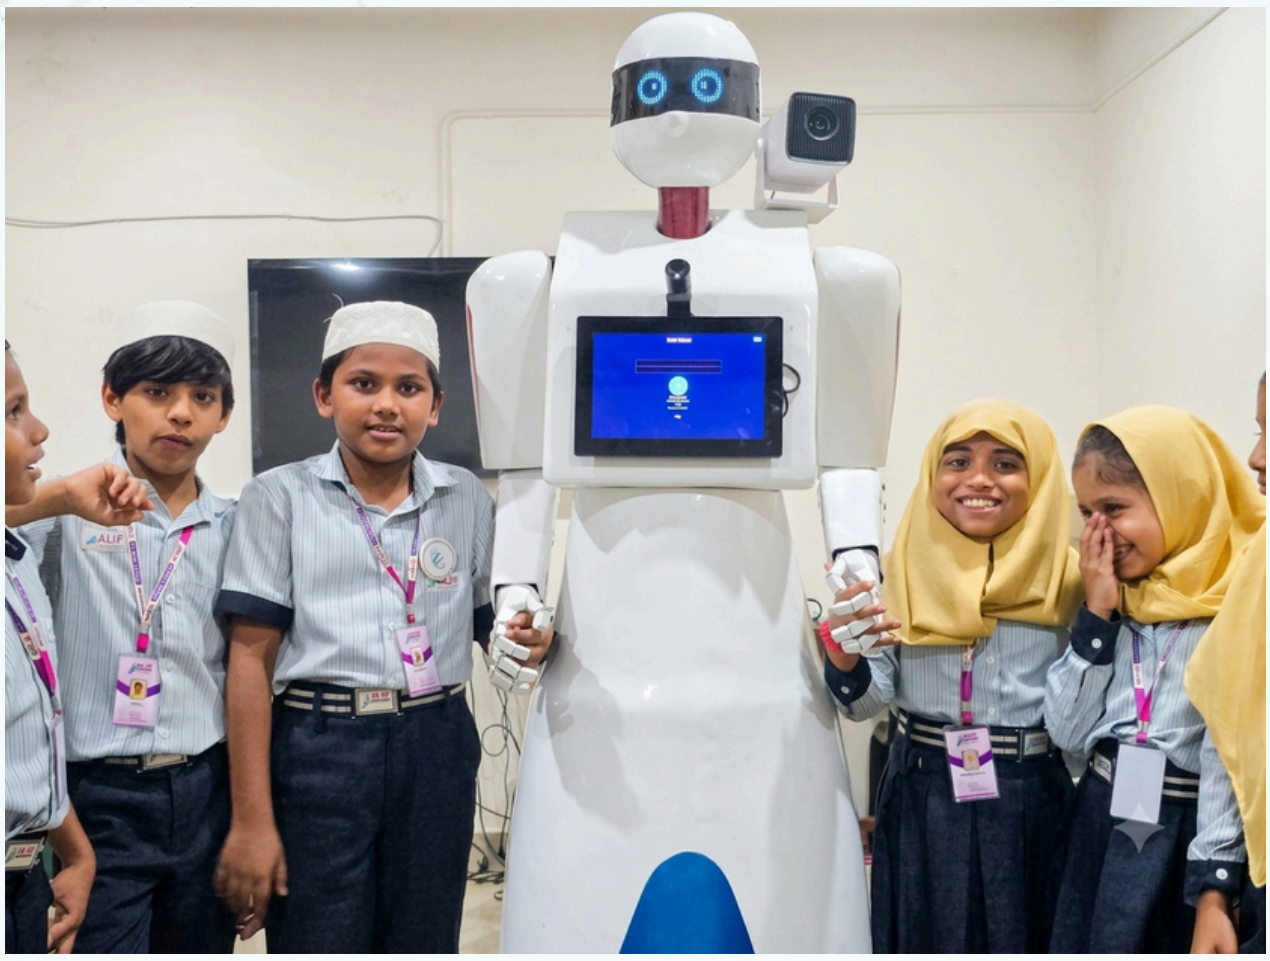

Roleplay and guided speech practice, building confidence out loud.

Class activities

Structured group exercises, including live debate sessions.

COMPLIANCE & SAFETY

Safety Standards

Designed and manufactured in line with industry safety regulations, SOVI is engineered for dependable, secure operation in both classrooms and homes — so educators and parents can trust it around students.

User Guidelines

SOVI is delivered with detailed setup and usage instructions, along with hands-on mentor training sessions. This ensures every user can operate SOVI confidently and responsibly, while maintaining proper safety practices throughout.

Warranty

Each SOVI unit is covered by a 1-year processor warranty, protecting against manufacturing defects and malfunctions. It's part of our broader commitment to customer satisfaction — reliable hardware, backed by dedicated support.

Terms & Conditions

1. Delivery Schedule: Delivery will be completed within 6 weeks from the date of receipt of the advance payment.
2. Taxes: IGST @ 18% is included in the invoice value.
3. Logistics: Packing, forwarding, freight, and unloading charges are included in the quoted price.
4. Payment Terms: 70% advance payment against the Purchase Order and the remaining 30% within one week after delivery/installation (or as agreed).

MENSCH ROBOTICS

FAQ

Q What is SOVI?

A SOVI is our AI-powered humanoid learning companion, bringing a responsive presence to the classroom.

Q How does SOVI move and interact physically?

A SOVI has a mobile base, a rotating head with expressive LED eyes, and articulated arms and hands — so it can gesture, turn to face a speaker, and navigate a room on its own or under manual control.

Q Is SOVI meant to replace teachers?

A No. SOVI is built to support educators, not replace them — handling Q&A, practice, and engagement so teachers can focus on individualized instruction.

Q Can SOVI play videos during a lesson?

A Yes — SOVI can search for and play relevant educational videos directly through its connected display, triggered by voice.

Q Can SOVI recognize and remember students?

A Yes. SOVI uses face recognition to identify students and personalize greetings and interactions across sessions.

Q Can SOVI look things up in real time if it doesn't know the answer?

A Yes — SOVI can toggle live web search on or off, and also draws on a built-in knowledge base for grounded, document-based answers when configured with reference material.

Q Do we get support after purchase?

A Yes — we provide onboarding training and regular software updates shaped by your teaching staff's feedback.
